

NPIC/D-3-70

7 JAN 1970

Vice Admiral Noel Gayler, USN
Director
National Security Agency
Fort George G. Meade, Md. 20755

Dear Noel:

I am in agreement with your proposal of 10 November 1969 to connect by secure circuit, an NSA compartmented area with NPIC's computer complex. This will provide advantages to both organizations.

If you will have the appropriate people meet with [redacted] Chief, Automated Information Division, NPIC, details can be worked out to accommodate the link-up by mid-summer 1970, when the Integrated Information System is expected to become operational.

Sincerely,

[redacted]
Arthur L. Lurula
Director
National Photographic Interpretation Center
